SUMMARY

Front-end developer with about three years of experience: two years building production dashboards in Next.js, React and TypeScript at Vconnct, and a year before that on client websites. Computer science graduate, with four tested projects of my own. I work in Arabic and English, right-to-left layouts included.

EXPERIENCE

Front-End Developer, Vconnct Oct 2024 – Sep 2026

- Built and maintained three production front-ends in Next.js, React and TypeScript: an admin dashboard, a visitor dashboard and a shared developer kit. One of the main developers on all three.
- Admin dashboard: filterable and paginated data tables, role-based access control in middleware, a reworked notification system, meeting and call features, and analytics pages.
- Visitor dashboard: sign-up and booking flows with validation and error messages in English and Arabic, security headers, and time-zone fixes.
- Developer kit: built the LTI 1.3 integration with learning platforms (Moodle) end to end, plus organization-scoped data and the invoice and billing screens.
- Stack: Redux Toolkit, React Hook Form, Zod, TanStack Query, Supabase, i18next, MUI, Tailwind CSS.

Junior Front-End Developer, Blue Miletech Nasr City, Cairo · Feb 2023 – Mar 2024

- Made changes across a wide range of client websites, and built new sites in WordPress.
- Turned design files into responsive pages with HTML, CSS and Sass, and added interactive features with JavaScript and React.

PROJECTS

Ember Roastery: online store and admin dashboard on one database (Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS). Arabic and English, test-gateway checkout, PDF invoices, 139 unit and 240+ end-to-end tests.
coffee-ten-khaki.vercel.app · github.com/mostafa-m-m-m/coffee

Masar Car Rental: car booking flow with a live price breakdown including VAT and no double bookings (React, Vite). Pricing and date rules covered by unit tests. Concept project.
